

## JABARA

AV BOARD

design Shinsaku Miyamoto

2019

Jabara AV board is a cabinet for audio-visual equipment conceived to elegantly and flexibly insert itself into the contemporary home thanks to its many variations in size and structure. One or several storage compartments featuring tambour wooden doors are alternated with an area designed for technological components. The latter, which is identified by a tilt and turn door in dark tinted glass, introduces a strong compositional element which - by contrast - highlights the Japanese aesthetics of the slim vertical lines of the tambour doors, typical of the Yoshido cane doors and the Sagano bamboo forests in Kyoto.

### MATERIALS

Body frame:	Walnut Oak
Finishing:	Walnut polyurethane finish NL Oak polyurethane finish NL Oak polyurethane finish WH Oak polyurethane finish mTG
Door:	Sliding tambour door and glass flap door Steel powder coating with black and hairline stainless steel acrylic urethane coating with 6 colors

## JABARA

### SIDEBOARD

design Shinsaku Miyamoto

2018 | 2020

Jabara sideboard is characterized by its 'Jabara' door, a sliding tambour door whose classical design is refined to timeless and minimalist beauty. It looks modern but somehow exudes nostalgic warmth. The unique appearance of the door conjures up an image of beautiful and continuous fine lines particular to Japan, which are seen in reed screen doors of townhouses in summer, and a bamboo forest in Sagano, Kyoto. Strips cut out of selected natural wood, piece by piece, and their rounded surface create fantastic shades, which in turn accentuates its profound look. And its organic and dignified appearance brings excitement and comfort into a room. Thick leather is selected for the front panel of drawers because its smooth but firm texture makes it an ideal material that brings you comfort when your fingers touch it.

#### MATERIALS

Body frame:	Walnut Oak
